

Wind for Schools

NPS 100

Empowering teachers, students, and communities

Facing ballooning utility costs and expanding budgets, schools across the country have caught on to a new and forward-thinking solution with countless benefits: renewable energy from wind. By harnessing the wind that blows across playgrounds, parking lots, and university campuses, administrators and communities are realizing the immediate rewards that a community-sized wind turbine can bring to their facility.

Schools win with wind power

EDUCATIONAL OPPORTUNITIES A turbine in your schoolyard adds an experiential dimension to your school's science, math, and civic programs and can spark interest in the technicians and engineers of tomorrow.

LOWER UTILITY BILLS See your electrical costs drop the second your blades start spinning.

TAXPAYER BENEFITS Lower facility costs for your public schools can help balance budgets and lower the tax burden on community residents.

STABLE COST OF POWER As the price of power keeps going up, safeguard your school's budget against volatile energy costs by creating your own power.

GREEN ECONOMY These installations can bring high-value jobs to your community while increasing commerce at local businesses—from delis to service stations.

Offset utility costs at these school applications:

- >> College and university campuses
- >> Elementary, middle and high schools
- >> Research and technical centers

“The fact that we’re here at a school is maybe the best part...there’s so much to learn from this turbine that you can apply to social studies, science, and math classes. It fits into the world like it never has before.”

—LARRY CHRETIEN, EXECUTIVE DIRECTOR, ENERGY CONSUMERS ALLIANCE OF NEW ENGLAND

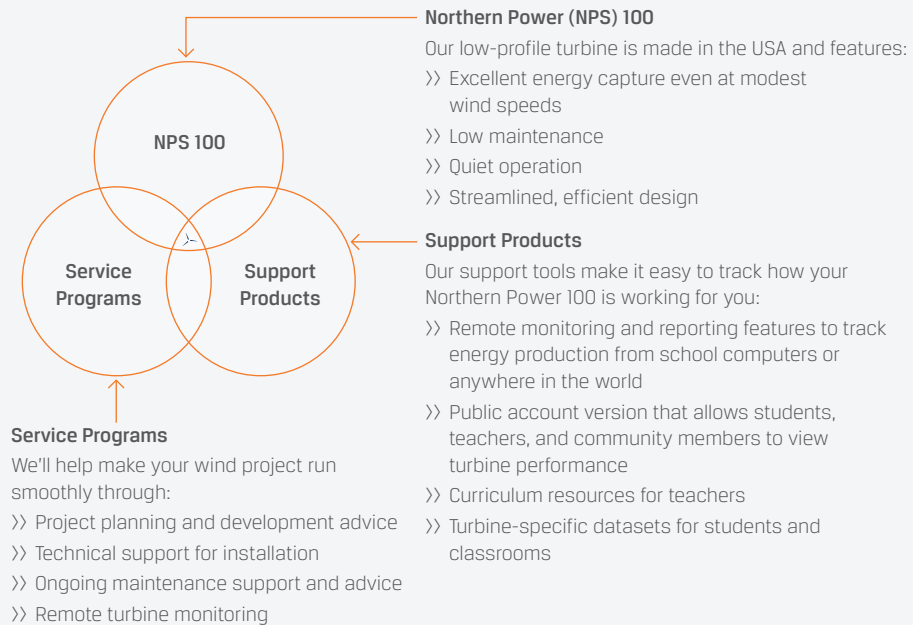

Cost savings could equal:

- >> Teacher positions
- >> Music, sports, and arts programs
- >> Supplies like books, smartboards, and computers
- >> Facility improvements
- >> Balanced budgets
- >> Hands-on educational opportunities
- >> Investment in other renewable initiatives

Offering comprehensive wind solutions for schools

Northern Power Systems has been a leader in wind power technology for over 30 years and continues to set the standard for advanced technology and reliable wind power. We understand schools' unique desire to educate future generations of workers and leaders, all while bringing lower, more stable energy costs to their budgets. Our turbines are designed for high performance and low maintenance and are surrounded by supporting products and services that can be tailored to fit your school's needs.

Northern Power Systems' Wind-for-Schools Program set includes:

It's your turn

Installing a Northern Power 100 on your campus is easier than you think. As the community wind market grows, so does the knowledge base of local developers, installers, utilities, and permitting officials. So you can be sure that those who have come before have paved a smooth path for you to follow.

Whether you are just beginning to evaluate wind for your site or ready to make a turbine decision, we can help. Call us at 1-877-90-NORTH or visit www.northernpower.com/community-wind.
